

as a flight attendant I feel allowing cell phones onboard/inflight will only enhance air rage among passengers. There will be angry PAX's who would prefer to sleep, read etc. w/out hearing peoples conversations around them. Most important, our job will be ignored, safety will come 2nd to these people, as it is they don't listen to us now...PLEASE don't allow this convenience to a few PAX's, and ignoring the rest of us who would rather have a safe and comfortable flying experience. Thank you
